## Canna

## Roots

Our roots are extra strong, with plenty of eyes, are clean and absolutely true to name. When ordering please state if immediate shipment is desired; also if we shall send via express or freight. The heights quoted on Cannas are determined from the growth in our own nursery, all being grown in soil of the same degree of fertility. These may vary with soil and climatic changes. The colors are arrived at from the standard color nomenclature book.

# MICHELL'S FANCY LEAVED CALADIUMS

(READY IN JANUARY)

These are grown for us on contract by one of the leading hybridizers of the world. Our list is composed of twelve of the best named sorts, covering a wide range of colors, which are difficult to describe accurately in print.

Wonderful effects can be produced in table or conservatory decorations with these beautifully marked tropical foliage plants. The bulbs should be started in damp moss, somewhat like Begonias, with plenty of bottom heat and an occasional dampening. Do not allow them to get chilled, and at all times grow them in as high a temperature as possible.

## WIZARD BRAND CATTLE OR COW MANURE

This is carefully selected manure taken from brick-paved cattle pens at Western Stock Yards, where the highest quality of Cattle Manure is available in large quantities. It is kept entirely separate from other manures and is reduced by the Wizard Brand process of direct heat drying and screening, and is packed in coarse, shredded form and in finely pulverized form.

Shredded Cattle Manure is slower acting, and is especially suited to every need of the rose grower for soil mixing, mulching and liquid manuring. It is used by many of the largest rose growers in this country.

Pulverized Cattle Manure is more quick in action and especially desirable for potting, etc.

## WIZARD BRAND PULVERIZED SHEEP MANURE

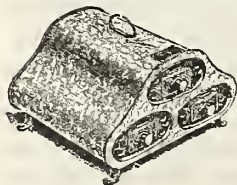

This is probably the most extensively used of animal manures by the florist and market gardener. The analysis shows it to be a perfectly balanced plant food.

Pulverized Sheep Manure acts quickly and is invaluable for carnations, mums and other crops that require a quick stimulant at certain stages of development or because of unfavorable weather conditions.
